

Lorenzo Fassina, PhD

Lorenzo Fassina graduated and PhD-ed in Bioengineering. He is Researcher (with permanent position) at the Dept. of Electrical, Computer and Biomedical Engineering of the University of Pavia (Italy), where he teaches Tissue Engineering and mentors PhD students. His main research field is Tissue Engineering via biomaterials and physical stimuli with specific attention for bone regeneration, cardiomyocyte's/heart's mechanics, statistics, and machine learning. He collaborates with national and international colleagues; he is author of some dozens of papers.
