

# Giacomo Prando

## Curriculum Vitae et Studiorum (last update: 8<sup>th</sup> October, 2024)

### 1. Personal information

Date and place of birth	17th November 1984 – Pavia, Italy
Nationality	Italian
Telephone number (office)	+39 0382 987 466
Researcher unique identifiers	0000-0002-7722-6599 (ORCID) ISU-9686-2023 (ResearcherID) 6602307937 (Scopus)
E-mail	giacomo.prando@unipv.it
Webpage	<a href="http://nmrphysics.unipv.it/people/prando/">nmrphysics.unipv.it/people/prando/</a>

### 2. Studies and education

March 2012	Defence of the <b>Ph. D. thesis</b> “Phase Diagrams of REFeAsO <sub>1-x</sub> F <sub>x</sub> Materials: Macroscopic and Nanoscopic Experimental Investigation”, supervisor Prof. Pietro Carretta.
November 2008 – December 2011	<b>Ph. D.</b> in “Physical Sciences of Matter” with a grant awarded by the National Interuniversity Consortium for the Physical Sciences of Matter (C.N.I.S.M.) at <b>Università degli Studi Roma Tre</b> , Italy.
September 2006 – September 2008	<b>Master of Science</b> in “Physical Sciences” (specialization in Condensed Matter Physics) at <b>Università degli Studi di Pavia</b> , Italy. Thesis “Dilution effects in Ho <sub>2-x</sub> Y <sub>x</sub> Sn <sub>2</sub> O <sub>7</sub> . From the Spin Ice to the single-ion magnet”, full marks with distinction (110/110 e lode), supervisor Prof. Pietro Carretta.
September 2003 – December 2006	<b>Bachelor</b> in “Physics” at <b>Università degli Studi di Pavia</b> , Italy. Thesis “ <i>Fluttuazioni superconduttive e diamagnetiche nella regione critica di nanoparticelle metalliche</i> ”, full marks with distinction (110/110 e lode), supervisor Prof. Attilio Rigamonti.
September 2003 – May 2009	Class of Science e Technologies (VIII cycle) at the <b>I.U.S.S. – School for Advanced Studies</b> , Pavia, Italy. Graduation thesis “Power-law distributions in nature and society”, supervisor Prof. Guido Montagna.
September 2003 – July 2008	Fellow of <b>Collegio Ghislieri</b> , Pavia, Italy, ranked by the Italian Ministry of Education, University and Research as Highly Qualifying Institution under the High Patronage of the Presidency of the Italian Republic, with first-year admission by national competitive examination.

### Language skills

Italian	Mother tongue.
English	Spoken: <i>fluent</i> . Written: <i>fluent</i> . Oral comprehension: <i>fluent</i> .
Spanish	Spoken: <i>good</i> . Written: <i>good</i> . Oral comprehension: <i>good</i> .
German	Spoken: <i>fair</i> . Written: <i>good</i> . Oral comprehension: <i>fair</i> .

### 3. Working positions

#### Current position

October 2024 – to date Associate professor at the Department of Physics of Università degli Studi di Pavia, Italy.

#### Past positions

October 2021 – September 2024 Assistant professor (*ricercatore RtdB*) at the Department of Physics of Università degli Studi di Pavia, Italy.

November 2017 – September 2021 Research associate (*ricercatore RtdA*) at the Department of Physics of Università degli Studi di Pavia, Italy.

March 2016 – November 2017 Associate editor at *Nature Nanotechnology*, Springer Nature, London, UK.

July 2015 – February 2016 Post-doctoral researcher at Technische Universität Dresden, Germany.

January 2012 – June 2015 Post-doctoral researcher at Leibniz-Institut für Festkörper- und Werkstoffforschung Dresden, Germany.

### 4. Honors and awards

December 2023 Successfully evaluated within the **Italian National Scientific Qualification** (*Abilitazione Scientifica Nazionale*). Qualified to become **Full Professor** (Experimental Condensed Matter Physics, 02/B1) in Italy until 6th December 2034.

September 2011 “A. Righi” Prize for Scientific Industry of Young Scientists (Italian Physical Society).

### 5. Research activity

#### Grants and projects

December 2022 - November 2025 Member of Spoke 7, “Complete quantum systems,” of the **National Quantum Science and Technology Institute** (Enlarged Partnerships extended to Universities, Research Centres, Enterprises under the National Recovery and Resilience Plan, funded by the European Union – NextGenerationEU) at Università degli Studi di Pavia.

November 2017 - February 2020 Member of the **Progetto di Rilevante Interesse Nazionale (PRIN)** “Controlling multi-band quantum materials by orbital manipulation” (2015 call, funded by the Italian Ministry of Education, University and Research) at Università degli Studi di Pavia.

July 2015 - February 2016 Member of the **Sonderforschungsbereichs (SFB) 1143** “Correlated magnetism: from frustration to topology” (funded by the Deutsche Forschungsgemeinschaft – DFG) at Technische Universität Dresden.

July 2013 – June 2015 Post-doctoral research fellow of the **Alexander von Humboldt Stiftung** with the individual Research Fellowship for Postdoctoral Researchers “Local features of magnetism in 3D topological insulators investigated by unconventionally-detected electron spin resonance” at Leibniz-Institut für Festkörper- und Werkstoffforschung Dresden.

July 2012 – June 2013 Post-doctoral research fellow of the **Deutscher Akademischer Austausch Dienst** with the individual Leibniz-DAAD Research Fellowship “Local features of magnetism in 1111 oxy-pnictide materials” at Leibniz-Institut für Festkörper- und Werkstoffforschung Dresden.

## Research interests

My research activity concerns solid state physics and, in particular, **magnetism and superconductivity in condensed matter** from an experimental perspective. Starting from the measurements I performed in 2006 within the framework of my Bachelor thesis, and up to my current work as assistant professor, I have been researching on **superconductors**, both conventional (lead nanoparticles) and unconventional with high critical transition temperatures (iron-based oxy-pnictides). I have focused on the microscopic study of electronic phase diagrams and of the **coexistence of magnetism and superconductivity** as a function of different tuning parameters, both chemical (substitutions) and physical (pressure). I have studied physical phenomena characteristic of the superconducting phase as well, such as the **vortex motion** and the **amplitude and/or phase fluctuations of the superconducting order parameter** at temperatures higher than the critical  $T_c$ . I have worked on electronic phase diagrams and magnetic properties of several **strongly-correlated electron systems** such as cuprates and, more recently, of **topological phases of matter** resulting from the coexistence of electronic correlations and spin-orbit interaction (iridium-based oxides). Finally, I have investigated the exotic magnetism arising in **geometrically-frustrated magnets** on tri-dimensional lattices (spin-ice, molybdenum-based pyrochlores) and in metal-organic frameworks.

## Technical skills

I am well-experienced in several techniques of magnetic investigation, of both macroscopic and local nature. **Dc magnetometry** and **magnetic ac susceptometry** belong to the former class. The latter class is composed by most of the magnetic spectroscopies such as **muon-spin rotation** ( $\mu^+$ SR), **nuclear magnetic resonance** (NMR), and **electron spin resonance** (ESR). For both  $\mu^+$ SR and dc magnetometry, I have gained a substantial experience with experimental set-ups enabling the application of **external pressures** (up to 6 GPa). As complementary techniques, I also have experience in measurements of **electrical transport** (resistivity) and **calorimetry** (specific heat).

## Noteworthy results of my research activity

- I tackled the mobility of flux lines in the mixed phase of iron-based superconductors – a topic rich with important implications for both fundamental and application-oriented research. To this aim, I performed measurements of ac susceptibility on both powder and single-crystal samples. My first results were relative to compounds belonging to the 1111 family and were published in [Physical Review B 83 174514](#) and [Physical Review B 85 144522](#). Here, I investigated the magnetic field – temperature phase diagram delimiting the regions where flux lines are not static, resulting in energy dissipation. Also, I quantified the characteristic energies for the pinning processes involving structural defects. More recently, I expanded these results to other families of iron-based superconductors ([Journal of Physics: Condensed Matter 25 505701](#)), where the phenomenology is different and reveals a critical scaling characteristic of a phase transition between solid and liquid phases for the flux lines.
- One of the first interesting experimental observations about iron-based superconductors belonging to the 1111 family has been the strong dependence of the maximum value of the critical temperature  $T_c$  on the lanthanoid element in the material. I focused on the comprehension of this phenomenology considering undoped, non-superconducting 1111 compounds based on Co. These materials are characterized by a ferromagnetic ground state which I investigated by means of muon spin spectroscopy under external pressure. Based on the results published in [Physical Review B 87 064401](#) and [Physical Review B 92 144414](#) I showed that the effect of pressure is quantitatively equivalent to that of the structural distortions induced by progressively increasing the size of the lanthanoid elements. These results were propaedeutical to the comprehension of superconducting systems under the effect of chemical and external pressures, allowing me to evidence the crucial effect of quenched disorder and non-magnetic defects – as I showed in [Physical Review Letters 114 247004](#).
- Among molecular machines, rotating functional chemical groups with highly controlled properties are of particular importance. In this context, recent research activities have been devoted to the synthesis of porous metal-organic frameworks where the rotating moieties are sustained along well-defined orientations by a fixed crystalline structure acting as stator. Using nuclear magnetic resonance, I was able to characterize the rotary dynamics of organic moieties embedded in a Zn-based metal-organic framework where ultrafast rotations are exceptionally preserved down to a few Kelvins, as published in [Nature Chemistry 12 845](#). Also, I demonstrated for the first time the feasibility of an analogous experimental investigation using muon-spin spectroscopy, publishing the results in [Nano Letters 20 7613](#).

## Bibliometrics

<b>Publications in peer-reviewed journals</b>	<b>45</b> Among these: 1 on <i>Nature Chemistry</i> , 1 on <i>Nature Communications</i> , 1 on <i>Nano Letters</i> , 4 on <i>Physical Review Letters</i> and 23 on <i>Physical Review B</i> . I am first author in 20 papers.
<b>Books</b>	1 (Ph. D. Thesis)
<b>Other publications</b>	<b>30</b> Among these: 27 single-author contributions on <i>Nature Nanotechnology</i> and <i>Nature Physics</i> .

<b>Citations</b>	<b>802</b> (Web of Science)	<b>h index</b>	<b>18</b> (Web of Science)
	<b>827</b> (Scopus)		<b>18</b> (Scopus)

## Peer review

<b>Research assessment</b>	ANVUR (Italian National Agency for the Evaluation of Universities and Research Institutes), Croatian Science Foundation, National Science Centre Poland.
<b>Scientific journals</b>	Physical Review Letters, Physical Review X, Physical Review B, Physical Review Materials, New Journal of Physics, Journal of Physics: Condensed Matter, Superconductor Science and Technology, Physica Status Solidi B, NPG Asia Materials.
<b>Publishing houses</b>	Oxford University Press.

## 6. Conferences, workshops and seminal activity

Invited talks at conferences and workshops	7 (see the list below, numbered It#.)	Invited talks and seminars in Universities	8	Contributed talks at conferences and workshops	23
--	--	--	---	--	----

<b>It7. June 2024</b>	International conference “Superstripes 2024” – Ischia, Italy. Talk “Preformed magnetic clusters in the paramagnetic phase of a high-temperature ferromagnetic MOF”.
<b>It6. June 2023</b>	International conference “Superstripes 2023” – Ischia, Italy. Talk “Coexisting superconductivity and charge-density wave in hydrogen-intercalated TiSe <sub>2</sub> ”.
<b>It5. April 2018</b>	International conference “6th International Conference on Superconductivity and Magnetism – ICSM2018” – Antalya, Turkey. Talk “Fe- and Co-based oxypnictides: Structural tuning of electronic ground states”.
<b>It4. March 2015</b>	Workshop “3rd ERC Symposium QuantumPuzzle” – Vienna University of Technology, Wien, Austria. Talk “ $\mu^+$ SR under pressure: investigations of magnetism and superconductivity in iron-based pnictides”.
<b>It3. June 2014</b>	Workshop “Itinerant Magnetism and Superconductivity - IMS 2014” – Dresden, Germany. Talk “Chemical dilutions, external and chemical pressures. Electronic phase diagrams of 1111 oxy-pnictides investigated by means of $\mu^+$ SR”.
<b>It2. October 2013</b>	Workshop “Hot Topics in HTSC: Fe-Based Superconductors” – Zvenigorod, Moscow, Russia. Talk “Electronic phase diagrams of 1111 oxy-pnictides investigated by means of muon spin spectroscopy”.
<b>It1. October 2011</b>	Workshop “Highlights in Condensed Matter Physics - Superconductivity and Magnetism” – Università degli Studi di Pavia, Pavia, Italy. Talk “NMR, $\mu^+$ SR and AC susceptibility in Fe-based superconductors”.

## Organization

February 2024	National Conference “Magnet2024 – VIII Italian conference on magnetism” – Milano, Italy.
August 2022	International Conference “Muon Spin Rotation, Relaxation and Resonance $\mu$ SR2020” – Parma, Italy.
October 2017	Nature Conference “Ferroic Materials: Challenges and opportunities” – Xi’an, China.
July 2014	Workshop “N $\mu$ M2014: NMR, $\mu^+$ SR, Mössbauer spectroscopies in the study of Fe-based and other unconventional high- $T_c$ superconductors”, Leibniz-Institut für Festkörper- und Werkstoffforschung – Dresden, Germany.

## Editorial activity

August 2022	Editor of the <a href="#">conference proceedings</a> of the <a href="#">International Conference</a> “Muon Spin Rotation, Relaxation and Resonance $\mu$ SR2020” – Parma, Italy.
-------------	--

## 7. Teaching, supervision and educational activities

### Teaching

March 2024 – June 2024	Lecturer for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
March 2024 – April 2024	Lecturer for the course “Termodinamica” (“Thermodynamics” – 30 hours), Degree program in Building Engineering and Architecture, Università degli Studi di Pavia.
October 2023 – December 2023	Lecturer for the course “Magnetismo e superconduttività” (“Magnetism and superconductivity”, 48 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.
June 2023	Lecturer for the course “Introduzione alla fisica dei solidi” (“Introduction to solid state physics”), lecture on superconductivity (2 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
March 2023	Lecturer for the course “Soft Skills”, module on Scientific Writing (6 hours), Ph. D. in Physics, Università degli Studi di Pavia.
March 2023 – June 2023	Lecturer for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
October 2022 – December 2022	Lecturer for the course “Magnetismo e superconduttività” (“Magnetism and superconductivity”, 48 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.
June 2022	Lecturer for the course “Introduzione alla fisica dei solidi” (“Introduction to solid state physics”), lecture on superconductivity (2 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
May 2022	Lecturer for the course “Soft Skills”, module on Scientific Writing (4 hours), Ph. D. in Physics, Università degli Studi di Pavia.
May 2022	Lecturer for the course “Condensed Matter Physics II”, lecture on experimental methods in magnetism (2 hours), two-year Master in Physics, Università degli Studi di Roma “La Sapienza.”
March 2022 – June 2022	Lecturer for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
October 2021 – January 2022	Lecturer for the course “Magnetismo e superconduttività” (“Magnetism and superconductivity”, 48 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.

<b>June 2021</b>	<b>Lecturer</b> for the course “Introduzione alla fisica dei solidi” (“Introduction to solid state physics”), lecture on superconductivity (2 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>March 2021 – June 2021</b>	<b>Lecturer</b> for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>October 2020 – December 2020</b>	<b>Lecturer</b> for the course “Magnetismo e superconduttività” (“Magnetism and superconductivity”) – module on phase transitions (16 hours) and module on superconductivity (16 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.
<b>June 2020</b>	<b>Lecturer</b> for the course “Introduzione alla fisica dei solidi” (“Introduction to solid state physics”), lecture on superconductivity (2 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>March 2020 – June 2020</b>	<b>Lecturer</b> for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>October 2019 – January 2020</b>	<b>Lecturer</b> for the course “Magnetismo e superconduttività” (“Magnetism and superconductivity”) – module on phase transitions (16 hours) and module on superconductivity (16 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.
<b>May 2019</b>	<b>Lecturer</b> for the course “Introduzione alla fisica dei solidi” (“Introduction to solid state physics”), lecture on superconductivity (2 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>April 2019</b>	<b>Lecturer</b> for the course “Magnetic Resonance Techniques in Solid State Physics”, module on Electron Spin Resonance (6 hours), Ph. D. in Physics, Università degli Studi di Pavia.
<b>March 2019 – June 2019</b>	<b>Lecturer</b> for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>December 2018 – January 2019</b>	<b>Lecturer</b> for the course “Complementi di struttura della materia” (“Structure of matter – complements”) – module on Superconductivity (16 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.
<b>March 2018 – May 2018</b>	<b>Lecturer</b> for the course “Struttura della materia” (“Structure of matter”), problem solving (20 hours), three-year Bachelor in Physics, Università degli Studi di Pavia.
<b>December 2017 – January 2018</b>	<b>Lecturer</b> for the course “Complementi di struttura della materia” (“Structure of matter – complements”) – module on Superconductivity (16 hours), two-year Master in Physical Sciences, Università degli Studi di Pavia.
<b>May 2015</b>	<b>Lecturer</b> for the course “Magnetic Spectroscopies”, module on Electron Spin Resonance (6 hours), Ph. D. in Physics, Università degli Studi di Pavia.
<b>January 2010</b>	<b>Seminar</b> “Monopoli magnetici in ghacci di spin” (“Magnetic monopoles in spin-ice”) for students of the three-year Bachelor in Physics, Università degli Studi di Pavia.

## Supervision of students

### Master in Physical Sciences – Università degli Studi di Pavia

3. C. Aloisi (currently under supervision).
2. S. Resmini. Supervisor of the thesis “Collective excitations of the charge-density wave state in hydrogen-intercalated TiSe<sub>2</sub> probed by <sup>1</sup>H nuclear magnetic resonance” (February 2023).
1. P. Battistoni. Supervisor of the thesis “Low-frequency fluctuations in LaFeAsO<sub>1-x</sub>F<sub>x</sub> iron-based superconductors” (October 2019).

## Bachelor in Physics – Università degli Studi di Pavia

5. S. Filippi, supervisor of the thesis “Magnetismo ad alta temperatura in un reticolo metallorganico: uno studio di spettroscopia muonica” (October 2022).
4. E. Brusaschi, supervisor of the thesis “Proton quantification in intercalated  $\text{TiSe}_2\text{H}_x$  using  $^1\text{H}$  nuclear magnetic resonance” (March 2022).
3. M. Ragni, supervisor of the thesis “La materia in condizioni estreme: idruri superconduttivi con temperatura critica a 250 K” (June 2020).
2. S. Macedonio, supervisor of the thesis “Proprietà magnetiche del pirocloro  $(\text{Eu}_{1-x}\text{Bi}_x)_2\text{Ir}_2\text{O}_7$ . Uno studio di spettroscopia muonica” (December 2019).
1. A. De Cecco, co-supervisor of the thesis “Studio delle proprietà di materiali superconduttori tramite suscettometro ac basato su SQUID” (October 2011).

## Istituto Universitario di Studi Superiori (IUSS) Pavia

1. C. Fruet, supervisor of the thesis “Ultrafast molecular rotors in metal-organic frameworks at cryogenic temperatures” (May 2021).

## Internships

2. B. Costarella (from École Normale Supérieure Paris-Saclay, March - July 2023).
1. A. Apaix (from École Normale Supérieure de Lyon, May - July 2022).

## Educational activities and dissemination

<b>September 2023</b>	Organizer of the “Low temperature physics” stand at the <b>European Researchers’ Night</b> – Pavia, Italy.
<b>September 2019</b>	Organizer of the “Low temperature physics” stand at the <b>European Researchers’ Night</b> – Pavia, Italy.
<b>September 2018</b>	Organizer of the “Low temperature physics” stand at the <b>European Researchers’ Night</b> – Pavia, Italy.
<b>June 2018</b>	Seminar and lab activities about magnetism and superconductivity in condensed matter within the <b>Summer Training Course</b> for 4th-year students of high schools of the province of Pavia (organized by the Department of Physics of the University of Pavia – Pavia, Italy).

## Dr Giacomo Prando

### List of Publications (last update: 8th October, 2024)

#### Bibliometrics

Publications in peer-reviewed journals	45	Among these: 1 on <i>Nature Chemistry</i> , 1 on <i>Nature Communications</i> , 1 on <i>Nano Letters</i> , 4 on <i>Physical Review Letters</i> and 23 on <i>Physical Review B</i> . I am first author in 20 papers.
Books	1	(Ph. D. Thesis)
Other publications	30	Among these: 27 single-author contributions on <i>Nature Nanotechnology</i> and <i>Nature Physics</i> .

## Dr Giacomo Prando

### Conferences/Workshops/Seminars (last update: 8th October, 2024)

Invited talks at conferences and workshops	7	Invited talks and seminars in Universities	8	Contributed talks at conferences and workshops	23
--	---	--	---	--	----

### Invited talks at conferences and workshops

- It7. June 2024** International conference “Superstripes 2024” – Ischia, Italy. Talk “Preformed magnetic clusters in the paramagnetic phase of a high-temperature ferromagnetic metal-organic framework”.
- It6. June 2023** International conference “Superstripes 2023” – Ischia, Italy. Talk “Coexisting superconductivity and charge-density wave in hydrogen-intercalated  $\text{TiSe}_2$ ”.
- It5. April 2018** International conference “6th International Conference on Superconductivity and Magnetism – ICSM2018” – Antalya, Turkey. Talk “Fe- and Co-based oxypnictides: Structural tuning of electronic ground states”.
- It4. March 2015** Workshop “3rd ERC Symposium QuantumPuzzle” – Vienna University of Technology, Wien, Austria. Talk “ $\mu^+$ SR under pressure: investigations of magnetism and superconductivity in iron-based pnictides”.
- It3. June 2014** Workshop “Itinerant Magnetism and Superconductivity - IMS 2014” – Dresden, Germany. Talk “Chemical dilutions, external and chemical pressures. Electronic phase diagrams of 1111 oxy-pnictides investigated by means of  $\mu^+$ SR”.
- It2. October 2013** Workshop “Hot Topics in HTSC: Fe-Based Superconductors” – Zvenigorod, Moscow, Russia. Talk “Electronic phase diagrams of 1111 oxy-pnictides investigated by means of muon spin spectroscopy”.
- It1. October 2011** Workshop “Highlights in Condensed Matter Physics - Superconductivity and Magnetism” – Università degli Studi di Pavia, Pavia, Italy. Talk “NMR,  $\mu^+$ SR and AC susceptibility in Fe-based superconductors”.

### Invited talks and seminars in Universities

- Is8. January 2017** “Interplay between structural effects and electronic ground states in Fe-based oxypnictides and pyrochlore iridates”, Dipartimento di Fisica, Università degli studi di Pavia.
- Is7. September 2016** “Electronic phase diagrams of iron-based spin-ladders”, Leibniz-IFW, Dresden.
- Is6. March 2015** “Exotic electronic properties of iridium oxides driven by strong spin-orbit coupling”, Laboratoire de Physique des Solides, Orsay - Paris 11 University.
- Is5. January 2015** “Recent  $\mu^+$ SR studies of frustrated metallic pyrochlores and pnictide superconductors”, Technische Universität, Dresden.
- Is4. November 2014** “Electronic phase diagrams of 1111 oxy-pnictides investigated by  $\mu^+$ SR”, Laboratoire de Physique des Solides, Orsay - Paris 11 University.
- Is3. March 2011** “Phase diagram of RE1111 oxy-pnictides: insights into SDW and SC phases by means of NMR,  $\mu$ SR and AC susceptibility measurements”, Leibniz-IFW, Dresden.
- Is2. March 2011** “Phase diagram of RE1111 oxy-pnictides: insights into SDW and SC phases by means of NMR,  $\mu$ SR and AC susceptibility measurements”, Laboratoire de Physique des Solides, Orsay - Paris 11 University.
- Is1. November 2010** “Distribuzioni statistiche a legge di potenza nella natura, nell'economia e nella società” (“Power-law distributions in nature, economics and society”) at Istituto Lombardo – Accademia di Scienze e Lettere, Milano.

## Contributed talks at conferences and workshops

- Ct23. July 2024** International conference “MOF2024 – 9th International Conference on Metal-Organic Frameworks and Open Framework Compounds” – Singapore. Talk “Preformed magnetic clusters in the paramagnetic phase of a high-temperature ferromagnetic metal-organic framework”.
- Ct22. July 2024** International conference “ICM2024 – International Conference on Magnetism” – Bologna, Italy. Talk “Preformed magnetic clusters in the paramagnetic phase of a high-temperature ferromagnetic metal-organic framework”.
- Ct21. September 2023** International workshop “Magnetic Resonance of Correlated Electron Materials” – Dresden, Germany. Talk “Spatially-textured charge-density wave phase in hydrogen-intercalated 1T-TiSe<sub>2</sub>”.
- Ct20. September 2023** International conference “CMD 30 – FisMat 2023” – Milano, Italy. Talk “Spatially-textured charge-density wave phase in hydrogen-intercalated 1T-TiSe<sub>2</sub>”.
- Ct19. August 2022** International conference “MuSR 2020 – 15th International Conference on Muon Spin Rotation, Relaxation and Resonance” – Parma, Italy. Talk “Ultrafast molecular rotors in metal-organic frameworks: a combined <sup>1</sup>H-NMR and  $\mu$ SR study”.
- Ct18. February 2020** International conference “SuperFOx 2020 – Conference on Superconductivity and Functional Oxides” – Santa Margherita Ligure, Italy. Talk “Influence of hydrostatic pressure and of Eu/Bi substitution on the magnetic properties of Eu<sub>2</sub>Ir<sub>2</sub>O<sub>7</sub>”.
- Ct17. October 2019** National conference “Italian National Conference on Condensed Matter Physics (FisMat 2019)” – University of Catania, Italy. Talk “Influence of hydrostatic pressure and of Eu/Bi substitution on the magnetic properties of Eu<sub>2</sub>Ir<sub>2</sub>O<sub>7</sub>”.
- Ct16. June 2019** International conference “Spectroscopies in Novel Superconductors” – University of Tokyo, Japan. Talk “Hints of orbital-selectivity and charge-order in AFe<sub>2</sub>As<sub>2</sub> (A = Cs, Rb) iron-based superconductors by means of <sup>75</sup>As nuclear quadrupole resonance”.
- Ct15. June 2019** Workshop “Research Frontier of Advanced Spectroscopies for Correlated Electron Systems” – Tohoku University, Sendai, Japan. Talk “Tuning the Magnetocrystalline Anisotropy in RCoPO by Means of R Substitution: A Ferromagnetic Resonance Study”.
- Ct14. October 2015** National conference “Italian National Conference on Condensed Matter Physics (FisMat 2015)” – University of Palermo, Italy. Talk “Mutual independence of  $T_c$  and superfluid density under pressure in optimally-doped LaFeAsO<sub>1-x</sub>F<sub>x</sub>”.
- Ct13. June 2014** International conference “13th International Conference on Muon Spin Rotation, Relaxation and Resonance ( $\mu$ SR2014)” – Grindelwald, Switzerland. Talk “Electronic Phase Diagrams of 1111 Oxy-Pnictides Upon Charge Doping and External Pressure”.
- Ct12. April 2014** International conference “4th International Conference on Superconductivity and Magnetism - ICSM2014” – Antalya, Turkey. Talk “Electronic Phase Diagrams of 1111 Oxy-Pnictides Investigated by Means of  $\mu^+$ SR”.
- Ct11. March 2014** International Conference “DPG Spring Meeting 2014” – Dresden, Germany. Talk “Effects of hydrostatic pressure on the superconducting properties of LaFeAsO<sub>1-x</sub>F<sub>x</sub>”.
- Ct10. March 2014** International Conference “DPG Spring Meeting 2014” – Dresden, Germany. Talk “Ac susceptibility investigation of vortex dynamics in nearly-optimally doped Ba(Fe<sub>1-x</sub>Co<sub>x</sub>)<sub>2</sub>As<sub>2</sub>”.
- Ct9. March 2013** International Conference “DPG Spring Meeting 2013” – Regensburg, Germany. Talk “Chemical and external pressures in ReFeAsO (Re = La, Ce, Pr, Sm) and ReCoPO (Re = La, Pr) by means of  $\mu^+$  spin spectroscopy”.

- Ct8. March 2013** International Conference “DPG Spring Meeting 2013” – Regensburg, Germany. Talk “Ac susceptibility investigation of vortex dynamics in nearly-optimally doped  $\text{ReFeAsO}_{1-x}\text{F}_x$  (Re = La, Ce, Sm) and  $\text{Ba}(\text{Fe}_{1-x}\text{Co}_x)_2\text{As}_2$  superconductors”.
- Ct7. September 2012** International Conference “JEMS 2012 – Joint European Magnetic Symposia” – Parma, Italy. Talk “Pressure effect on the magnetic and superconducting properties of  $\text{REFeAsO}_{1-x}\text{F}_x$  (RE = Sm, Ce, La)”.
- Ct6. June 2012** International Conference “SuperFOx 2012 – First Conference on Superconductivity and Functional Oxides” – Politecnico di Milano, Como, Italy. Talk “Ac susceptibility investigation of vortex dynamics in nearly-optimally doped  $\text{REFeAsO}_{1-x}\text{F}_x$  (RE = La, Ce, Sm) and  $\text{Ba}(\text{Fe}_{1-x}\text{Co}_x)_2\text{As}_2$  superconductors”.
- Ct5. May 2011** International Conference “MuSR2011 – 12th International Conference on Muon Spin Rotation, Relaxation and Resonance” – Cancun, Mexico. Talk “Evolution of magnetic phases in  $\text{REFeAsO}$  oxypnictides under external pressure and isovalent substitution”.
- Ct4. February 2011** National Conference “Magnet11 – II Convegno Nazionale di Magnetismo” – Torino, Italy. Talk “Evolution of magnetic phases in  $\text{REFeAsO}$  oxypnictides under external pressure and diamagnetic substitution”.
- Ct3. September 2010** National Conference of the Italian Physics Society – University of Bologna, Italy. Talk “On the microscopic magnetic properties of superconducting  $\text{SmFeAsO}_{1-x}\text{F}_x$ ”.
- Ct2. September 2010** National Conference “SATT 15 – Conferenza Nazionale di Superconduttività” – Alghero, Italy. Talk “On the microscopic magnetic properties of superconducting  $\text{SmFeAsO}_{1-x}\text{F}_x$ ”.
- Ct1. June 2010** International conference “CIMTEC 2010 - 5 Forum on New Materials” – Montecatini Terme, Italy. Talk “On the microscopic magnetic properties of superconducting  $\text{SmFeAsO}_{1-x}\text{F}_x$ ”.
