

**Personal information**

Name: Chiara Toffanin
Email: chiara.toffanin@unipv.it

Profile

Motivated computer science engineer with interest and experience in automatic control, in particular applied to biological system connected to metabolism. Experience in modelling, model predictive control and data analysis in several industrial and biomedical applications, bioinformatics related to cancer research and control applied to nuclear magnetic resonance devices. My interests also include machine learning techniques to model dynamic systems and stability studies of neural networks. Experienced in working in team and independently, and passionate about research in a dynamic, stimulating, and multidisciplinary environment.

Academic career

2022 – present	Associate Professor at University of Pavia, Department of Electrical, Computer and Biomedical Engineering; SSD ING-INF/04 - Automatica
2022 – present	Associate of the Harvard John A. Paulson School of Engineering and Applied Sciences, Harvard University (Boston, USA)
2019 – 2022	Assistant Professor (RTDb) at University of Pavia, Department of Electrical, Computer and Biomedical Engineering; SSD ING-INF/04 - Automatica
2017 – 2019	Assistant Professor (RTDa) at University of Pavia, Department of Electrical, Computer and Biomedical Engineering; SSD ING-INF/04 - Automatica
2016 – 2017	Postdoctoral researcher at University of Pavia Design and development of control algorithms
2015 – 2016	Postdoctoral researcher at University of Oxford Cancer genomics: model-based curve fitting of high throughput screening data
2012 – 2015	Postdoctoral researcher at University of Pavia Artificial Pancreas: closed-loop system to control glycaemia in Type 1 diabetes
2009 – 2012	PhD student at University of Pavia Thesis title: “Artificial Pancreas: from modelling and control design to software implementation and clinical data analysis” (30/01/2013)
2007 – 2009	Master Degree in Computer Science Engineering at University of Pavia Thesis title: “Development of model predictive control algorithms applied to the Artificial Pancreas” Graduated with 110/110 cum laude (13/10/2009)
2004 – 2007	Bachelor Degree in Computer Science Engineering at University of Pavia Thesis title: “Studio per la realizzazione di un carrello elettronico con tecnologia Portal, JSR-168 Compliant” Graduated with 110/110 cum laude (18/09/2007)
1999 - 2004	High School Diploma in Computer Science Technology at Istituto Tecnico Industriale Statale G. Cardano Vote 100/100 with encomium

Research experience

2020 – present Research projects: Design and development of control algorithms for glucose control, model identification and machine learning approaches for glucose prediction, signal

- processing for glucose sensor development, modelling of industrial processes, optimal sensor placement and sizing in water networks, modelling and optimization for agrifood processes.
- 2017 – 2020 Research project: Design and development of control algorithms for glucose control and modelling of industrial autoclaves
- 2016 – 2017 Postdoctoral project: Design and development of control algorithms
- 2015 – 2016 Postdoctoral project: Development of a tool for the model-based curve fitting of high throughput screening data
- 2012 – 2015 Postdoctoral project: Development of control algorithms for an artificial pancreas
- Tuning of the algorithm exploiting data collected in outpatients clinical trials
 - Run-to-Run approaches to adapt the therapy day-by-day considering the variability of the patient
 - Non parametric and parametric identification techniques to tailor the model on each individual patient
 - Development of a tool for the analysis of a large amount of data collected during a preliminary 6-months clinical trial
- 2011 – 2012 Internship as academic research at University of California, Santa Barbara - Chemical Engineering Department
- Artificial Pancreas project: study of the insulin sensitivity dynamic and development of a safety module to avoid hypoglycaemia episodes to be integrated in the architecture of an artificial pancreas
- 2009 – 2012 PhD project: Development of model predictive control algorithms for the Artificial Pancreas
- Reengineering of the simulator developed in Simulink – Matlab environment
 - Improvement of the control algorithm exploiting new data collected in the clinical trials
 - Parametric approaches for the identification of new individual models to be used in the control algorithm
 - New procedure for tuning of the algorithm using the new parametric identified models
 - Development of a software platform for the clinical trials and integration of a telemedicine module with the control algorithm
 - Identification of a model for the noise which affects the glucose measurements using a large amount of data collected in clinical trials
 - Tuning of the algorithm exploiting data collected in longer clinical trials

Talk and seminar organization

- | | |
|-----------|--|
| Nov 2022 | Organizer of the seminar entitled "A mathematical model of the G1/S transition for the budding yeast" held by Prof. Pasquale Palumbo for the Ph.D. School of Electronics, Computer Science and Electrical Engineering, University of Pavia, 15 th November 2022 |
| June 2022 | Organizer of the seminar entitled "Coalitional control methods with applications to energy systems" held by Prof. Josè Maria Maestre Torreblanca for the Ph.D. School of Electronics, Computer Science and Electrical Engineering, University of Pavia, 13 th June 2022 |
| Dec 2018 | Organizer of the invited session entitled "Glucose Regulation and Biomedical Systems" at the 57 th IEEE Conference on Decision and Control, 17 th – 19 th December 2018 |

17/12/2018 Chair of the invited session entitled “Glucose Regulation and Biomedical Systems” at the 57th IEEE Conference on Decision and Control, 17th – 19th December 2018

Memberships in research projects

2023 - present Project HORIZON-EIC-2022-PATHFINDERCHALLENGES-01, “Unobtrusive Continuous Multi Metabolite Monitoring for a Physiological Care of Insulin-treated Diabetes” (MuSiC4Diabetes), WP leader of WP4 “Multi-Metabolite Data Science”, Scientific manager for the University of Pavia (315.262,50€)

2023 - present Project PRIN22, “Adaptive Personalised Safe Artificial Pancreas for children and adolescents” (APS-AP), Principal Investigator (199.674€)

2022 - present Project FET “A Bionic Invisible Pancreas To Forget Diabetes” (FORGETDIABETES), Scientific manager for the University of Pavia (45.000€)

2022 – present Project PNRR “Nord Ovest Digitale E Sostenibile” (NODES), Leader of the Research Modules RM8 (Flagship project VINO) and RM5 (Flagship project FORMIDABILAE)

20/2/2019 – 19/2/2020 Project “Sviluppo di un tool di modellizzazione e simulazione dei gruppi di fasi (P/G) del controllore Fedegari per autoclavi”, in collaboration with FEDEGARI AUTOCLAVI SpA, Scientific manager (30.000€)

24/1/2018 – 23/1/2019 Project “Sviluppo di un tool (TH4-PGMODEL) di modellizzazione e simulazione dei gruppi di fasi (P/G) del controllore THEMA4 per autoclavi”, in collaboration with FEDEGARI AUTOCLAVI SpA, Scientific manager (30.000€)

5/4/2017 - 4/1/2018 Project “Prototipazione di un tool (TH4-PGMODEL) di modellizzazione e simulazione dei gruppi di fasi (P/G) del controllore THEMA4”, in collaboration with FEDEGARI AUTOCLAVI SpA, Scientific manager (20.000€)

2016 - 2019 Project PRIN15: “Forget Diabetes: Adaptive Physiological Artificial Pancreas”, Member of the research unit of the University of Pavia (53.726€)

2016 – 2018 Project IDENTIFY: “Characterization, modelling and simulation software tool of the magnetic field control loop for Fast Field Cycling (FFC) NMR”, in collaboration with STELAR S.R.L., Member of the research unit of the University of Pavia (60.000€)

1/2/2010- 31/10/2014 European Project FP7-ICT-2009-4, “Bringing the Artificial Pancreas Home”, Member of the research unit of the University of Pavia (863.321€)

1/12/2010- 30/11/2014 FIRB – Futuro in Ricerca, “Pancreas artificiale: sviluppo in silico e validazione in vivo di algoritmi per il controllo della glicemia”, Member of the research unit of the University of Pavia (274.000€)

22/9/2008- 21/9/2010 Project PRIN07: Pancreas artificiale: modelli fisiologici, algoritmi di controllo e test clinico: “Algoritmi di controllo predittivo per il pancreas artificiale”, Member of the research unit of the University of Pavia (47.000€)

Participation to committees

2021- present Academic coordinator of bachelor’s degree in electronic and computer science engineering, University of Pavia (Referente Corso di Laurea triennale in Ingegneria Elettronica e Informatica)

2022- present Member of Steering Committee of the Faculty of Engineering (“Comitato direttivo della Facoltà di Ingegneria”) for the period 2022-2025

2022-present Coordinator of the tutoring projects “Automatic Control” and “Study groups for Electronic and Computer Science Engineering” at University of Pavia

10/05/2024	Member of the evaluation Committee of the Ph.D. candidates Marco Capelletti and Diego Locatelli at University of Pavia, Department of Electrical, Computer and Biomedical Engineering for the PhD course in "Electronics, Computer Science and Electrical Engineering"
21/12/2023	Member of the evaluation Committee of the Ph.D. candidate at University of Loyola Andalusia, Department of Engineering for the thesis entitled "Enhancing Smart and Sustainable Agriculture through Model Predictive Control Design and Implementation"
09-11/2022	Member of the evaluation Committee for the role of Assistant Professor (RTDa) at University of Pavia
05/2022	Member of the evaluation Committee for the role of Assistant Professor (RTDa) at IMT School for Advanced Studies Lucca
2018 - 2021	Member of the Department Council ("Giunta di Dipartimento")
2017 - present	Member of the Conference editorial board of the IEEE Control Systems Society (CSS), Associate Editor
2017 - present	Member of the board of teachers ("Collegio dei docenti") for the PhD course in "Electronics, Computer Science and Electrical Engineering", from cycle: XXXIII (academic year: 2017/2018)
07/12/2017	Member of the evaluation Committee of the Ph.D. candidate Konstanze Kolle at Norwegian University of Science and Technology, Department of Engineering Cybernetics for the thesis entitled "Towards a safe artificial pancreas: meal detection and the intraperitoneal route"

Awards and grants

2023	Winner of the CUIA fund for the workshop "Medicina in silico per il trattamento del diabete di tipo 1", 27 th -28 th April 2023, Santa Fe, Argentina
2022	Winner of the Best paper award for the work "Artificial pancreas under periodic MPC for trajectory tracking: handling circadian variability of insulin sensitivity" by Abuin P., A. Ferramosca, C. Toffanin, L. Magni, A.H. Gonzalez, at the 18th IFAC Workshop on Control Applications of Optimization (CAO22), Gif sur Yvette (France), 18 th -22 nd July 2022
2020	Winner of the Italian fund "Progetto Pavia – Boston 2020"
2017	Winner of the Italian fund "Finanziamento delle attività base di ricerca"
2015	Winner of postdoctoral fellowship at the Oxford University for high-throughput screen data analysis
2013	Finalist at MIMOS (Movimento Italiano Modellazione e Simulazione) competition, 3 rd position in the contest for the best PhD thesis on the 3D, virtually and simulation topics
2011/2012	Residential scholarship for PhD and master student in the biomedical field

Teaching

Sep 2023 – present	Professor at University of Pavia on optimization for the MSc course entitled "advanced automation and control" (54h - 5 CFU)
Mar 2017 – present	Professor at University of Pavia on automatic controls for the MSc course entitled "Industrial Control" (24h - 1 CFU)

Sep 2016 – present	Professor at University of Pavia on automatic controls for the BSc course entitled “Controlli Automatici” (Automatic control – 26h - 1 CFU)
Mar 2017 – present	Professor at University of Pavia on automatic controls for the BSc course entitled “Fondamenti di automatica” (Fundamentals of automation – 72h - 6 CFU)
April 2016	Training course at University of Oxford on high throughput screening data analysis using HTScape, entitled “Training for compound screens and other TDI plated screens”
Sep 2014 - Jan 2015	Teaching assistant at University of Pavia on automatic controls for the BSc course entitled “Controlli automatici” (Automatic control) Teaching assistant at University of Pavia on computer science for the BSc course entitled “Fondamenti di informatica” (Fundamentals of computer science)
Feb – Sep 2014	Teaching assistant at University of Pavia on computer science for the BSc course entitled “Fondamenti di informatica” (Fundamentals of computer science)
Sep 2013– Jan 2014	Teaching assistant at University of Pavia on automatic controls for the BSc course entitled “Controlli automatici” (Automatic control)
Dec 2010 - Jan 2011	Teaching assistant at University of Pavia on industrial control for the MSc course entitled “Controllo Industriale” (Industrial control)
Jun – July 2010	Teaching assistant at University of Pavia on automatic controls for the BSc course entitled “Controlli automatici” (Automatic control)
Mar - Jun 2010	Teaching assistant at University of Pavia on industrial automation for the MSc course entitled “Automazione Industriale” (Industrial automation)
Mar - April 2010	Lecturer at University of Pavia on introduction of system modelling and control for the BSc course entitled “Introduzione all’analisi dei sistemi” (Introduction to system theory)
Dec 2009 - Jan 2010	Teaching assistant at University of Pavia on system theory for the BSc course entitled “Teoria dei sistemi” (System theory)
Dec 2009 - Jan 2010	Teaching assistant at University of Pavia on industrial control for the MSc course entitled “Controllo Industriale” (Industrial control)
Feb 2006 - Sep 2008	Teaching assistant at University of Pavia on computer science for the BSc course entitled “Fondamenti di informatica” (Fundamentals of computer science)

Oral presentation and seminars

Sept 2023	“Personalized glucose regulation accounting for inter-individual and circadian variability”, SIDRA 2023: Convegno Annuale dei Docenti e Ricercatori Italiani in Automatica, Catania, Italy, 6 th – 8 th Sep, 2023
Aug 2023	“Artificial Pancreas: From an Invasive Device to a Portable, Patient-Tailored and Adaptive Control System Ensuring Patient’s Safety”, Keynote speaker at ESAO 2023: the 49th Annual Congress of the European Society for Artificial Organs, Bergamo, Italy, 29 th Aug – 1 st Sep, 2023
Oct 2022	“Closed-loop control in diabetes for artificial pancreas”, Workshop: Digital Health for Diabetes and its complications, Department of Electric, Computer and Biomedical Engineering, University of Pavia, Pavia, Italy, 14 th Oct, 2022

- Oct 2022 “Artificial Pancreas: from an invasive device to a portable, patient-tailored and adaptive control system ensuring safety”, ELE 601 Graduate Seminar, Department of Electrical, Computer, and Biomedical Engineering (ECBE), University of Rhode Island, Kingston, Rhode Island, USA, 7th Oct, 2022
- Apr 2021 “Artificial Pancreas: Evolution from an invasive device to a portable, patient-tailored and adaptive system ensuring safety”, PhD program in Automatic Control, Bioengineering and Operations Research (ABRO), 2021 ABRO Course on Advances in Automatic Control - Health and Control, Dipartimento di Ingegneria Informatica, Automatica e Gestionale Antonio Riberti, Università di Roma La Sapienza, Rome, Italy, 23rd Apr, 2021
- Apr 2021 “Artificial Pancreas: new challenges in T1D glucose control”, Laurea Magistrale in Elettronica per l'Automazione e le Telecomunicazioni, Dipartimento di Ingegneria, Università degli Studi del Sannio di Benevento, Benevento, Italy, 21st Apr, 2021
- Mar 2021 “Artificial Pancreas: new challenges in T1D glucose control”, Dipartimento di Ingegneria Gestionale, dell'Informazione e della Produzione, Università degli Studi di Bergamo, Bergamo, Italy, 23rd Mar, 2021
- Nov 2020 “Scalable model for industrial coffee roasting chamber”, IEEE ISM 2019: International Conference on Industry 4.0 and Smart Manufacturing, 23rd Nov, 2020
- Oct 2019 “Industry 4.0: Mathematical model for monitoring sterilization processes”, IEEE SMC 2019: IEEE International Conference on Systems, Man, and Cybernetics - Industry 4.0, Bari, Italy, 6th Oct, 2019
- Dec 2018 “Individualized Model Predictive Control for Type 1 Diabetes: the Pavia experience”, Department of Engineering Cybernetics, Norwegian University of Science and Technology (NTNU), Trondheim, Norway, 6th Dec, 2018
- Sept 2018 “Postprandial glucose regulation via KNN meal classification in type 1 diabetes”, SIDRA 2018: Convegno Annuale dei Docenti e Ricercatori Italiani in Automatica, Florence, Italy, 12th – 14th Sep, 2018
- Sept 2017 “Model Individualization for MPC based on Free-Living Conditions data”, SIDRA 2017: Convegno Annuale dei Docenti e Ricercatori Italiani in Automatica, Milan, Italy, 11th – 13th Sep, 2017
- Jul 2017 “Artificial Pancreas: From Control-To-Range to Control To-Target”, 18th IFAC World Congress, Toulouse, France, 2017, 9-14 July, invited session entitled “Advances in Artificial Pancreas Control Systems”
- Mar 2016 “HTScape: a tool/framework for HTS data analysis”, University of Oxford, Department of Oncology, Oxford, UK, 11th Mar, 2016
- Sep 2014 “Model Predictive Control for Artificial Pancreas: from in-silico to in-vivo”, SIDRA 2014: Convegno Annuale dei Docenti e Ricercatori Italiani in Automatica, Bergamo, Italy, 8th – 10th Sep, 2014
- Feb 2012 “Dynamic Insulin On Board”, UCSB, University of California Santa Barbara, Santa Barbara, California, 2nd Feb, 2012
- Aug 2011 “Model Predictive Control of Type 1 Diabetes added to Conventional Therapy”, 18th IFAC World Congress, Milan, Italy, 2011, 28 Aug–2 Sep, invited session entitled “Modeling and

Control for the Artificial Pancreas: a New Era in Glucose Regulation of People with Type 1 Diabetes Mellitus”

Feb 2011

“Clinical Software and demo for testing of different MPC controllers”, AP@home project meeting, London, UK, 16th – 19th Feb, 2011

Supervision activity

Ph.D. students (5)

- Tutor of Paolo Alberto Mongini, Ph.D. student, University of Pavia. “Development of an artificial pancreas for an effective glucose regulation”. Period 2023-present.
- Co-tutor of Irene Schimperna, Ph.D. student, University of Pavia. Period 2022-present.
- Tutor of Jorge Lo Presti, Ph.D. student, University of Pavia. “Control algorithms based on neural network”. Period 2021-present.
- Tutor of Francesca Iacono, Ph.D. student, University of Pavia. “Modelling and Control of industrial processes”. Period 2019-present.
- Tutor of Eleonora Maria Aiello, Ph.D. student, University of Pavia. “Control algorithms for Artificial Pancreas”. Period 2016-2019. Currently Post-doc at Harvard University.

Master students (19)

- Advisor of Alessandro Alini, Master Thesis in Industrial Automation Engineering, University of Pavia. “Integer Linear Programming to Optimize the Order Start Logic in an Automated Warehouse”. Academic year 2022/2023.
- Advisor of Paolo Alberto Mongini, Master Thesis in Industrial Automation Engineering, University of Pavia. “Design and implementation of a control system for dosing of chemical and cosmetic products”. Academic year 2022/2023.
- Advisor of Sara Macri, Master Thesis in Computer Science Engineering, University of Pavia. “Optimization of the Production of a Robotic Dosing System”. Academic year 2021/2022.
- Advisor of Gabriele Carmagnoli, Master Thesis in Industrial Automation Engineering, University of Pavia. “Artificial Pancreas: an in silico study of advanced Model Predictive Control strategies”. Academic year 2020/2021.
- Co-Advisor of Irene Schimperna, Master Thesis in Computer Science Engineering, University of Pavia. “Offset-free Nonlinear Model Predictive Control with LSTM neural networks”. Academic year 2021/2022.
- Advisor of Rebecca Franchi, Master Thesis in Industrial Automation Engineering, University of Pavia. “Artificial pancreas: toward a multiday run-to-run approach”. Academic year 2020/2021.
- Advisor of Andrea Marazzi, Master Thesis in Industrial Automation Engineering, University of Pavia. “Identificazione del modello di un autoclave per processi di sterilizzazione in vapor saturo”. Academic year 2019/2020.
- Advisor of Jorge Lo Presti, Master Thesis in Industrial Automation Engineering, University of Pavia. “Modelling of a pH neutralization process via recurrent neural networks: stability study and possible control applications”. Academic year 2019/2020.

- Advisor of Macha Dinesh Chandra Murthy, Master Thesis in Industrial Automation Engineering, University of Pavia. “Autoclave modelling: model definition and parameters optimization of the jacket subsystem”. Academic year 2019/2020.
- Advisor of Francesca Iacono, Master Thesis in Industrial Automation Engineering, University of Pavia. “Model of an autoclave in air-steam and saturated steam cycles: definition and parameters optimization”. Academic year 2017/2018.
- Advisor of Mattia Grecchi, Master Thesis in Computer Science Engineering, University of Pavia. “Individual model for artificial pancreas: identification from free-living condition data”. Academic year 2015/2016.
- Co-Advisor of Giacomo Galuppini, Master Thesis in Computer Science Engineering, University of Pavia. “Study for a Field Frequency Lock for FFC NMR applications”, Advisor Prof. Lalo Magni. Academic year 2015/2016.
- Co-Advisor of Andrea Mezzadra, Master Thesis in Computer Science Engineering, University of Pavia. “Identification of glucose-insulin models for MPC glucose control in Type 1 diabetic patients: a non-parametric approach”, Advisor Prof. Lalo Magni. Academic year 2013/2014.
- Co-Advisor of Eleonora Maria Aiello, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Identificazione di modelli per un pancreas artificiale tramite ottimizzazione vincolata”, Advisor Prof. Lalo Magni. Academic year 2013/2014.
- Co-Advisor of Luca Andretta, Master Thesis in Computer Science Engineering, University of Pavia. “Identificazione non parametrica di modelli per la progettazione di un Pancreas Artificiale”, Advisor Prof. Lalo Magni. Academic year 2012/2013.
- Co-Advisor of Alice Sandri, Master Thesis in Computer Science Engineering, University of Pavia. “Individualizzazione automatica di terapie per la cura di pazienti diabetici di tipo 1”, Advisor Prof. Lalo Magni. Academic year 2012/2013.
- Co-Advisor of Mirko Messori, Master Thesis in Computer Science Engineering, University of Pavia. “Riprogettazione di uno schema di controllo predittivo per un Pancreas Artificiale a partire da dati clinici”, Advisor Prof. Lalo Magni. Academic year 2011/2012.
- Co-Advisor of Marcello Torchio, Master Thesis in Computer Science Engineering, University of Pavia. “Modellazione del segnale di rumore di un sensore di glicemia sottocutanea per lo sviluppo di un Pancreas Artificiale”, Advisor Prof. Lalo Magni. Academic year 2011/2012.
- Co-Advisor of Paola Soru, Master Thesis in Computer Science Engineering, University of Pavia. “Stima di modelli lineari per il Pancreas Artificiale”, Advisor Prof. Lalo Magni. Academic year 2009/2010.

Bachelor students (58)

- Advisor of Mariarosaria Martinelli, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Studio di un approccio data driven per il rilevamento dei pasti non annunciati in pazienti diabetici”. Academic year 2022/2023.
- Advisor of Andrea Baraldi, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Sviluppo di un tool per la rilevazione dei pasti in pazienti diabetici di tipo 1”. Academic year 2022/2023.

- Advisor of Andra Roman, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Sviluppo di un sistema di allarme per le ipoglicemie basato su reti neurali LSTM”. Academic year 2022/2023.
- Advisor of Edoardo Giani, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Sviluppo di un sistema di rilevamento dei pasti non annunciati in pazienti diabetici”. Academic year 2022/2023.
- Advisor of Federico Romano, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Progetto RoboCam: descrizione della fotocamera e dei sensori e loro utilizzo per la navigazione del robot”. Academic year 2022/2023.
- Advisor of Federica Tetta, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Predizione della glicemia per pazienti diabetici: gestione della variabilità intra-giornaliera con approccio multi-modello”. Academic year 2022/2023.
- Advisor of Matteo Pilotti, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Studio di reti LSTM per la predizione della glicemia in pazienti diabetici di tipo 1”. Academic year 2022/2023.
- Advisor of Gabriele Invernizzi, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Progetto RoboCam: definizione della strategia di gioco e sua modellizzazione tramite macchine a stati finiti”. Academic year 2022/2023.
- Advisor of Rebecca Maccagni, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Progetto RoboCam: studio del sensore LIS3MDL per la navigazione del robot”. Academic year 2022/2023.
- Advisor of Agnese Filippini, Bachelor Thesis in Electronic Engineering, University of Pavia. “Progetto RoboCam: descrizione dell'hardware e studio dei componenti del robottino”. Academic year 2022/2023.
- Advisor of Stefano Martelli, Bachelor Thesis in Electronic Engineering, University of Pavia. “Studio e addestramento di reti LSTM per la predizione della glicemia in pazienti affetti da diabete di tipo 1”. Academic year 2022/2023.
- Advisor of Pierpaolo Lombardi, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Progetto RoboCam: studio dei motori in corrente continua per l'azionamento delle ruote”. Academic year 2022/2023.
- Advisor of Rita Vittone, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Ottimizzazione della soglia per il rilevamento dei pasti non annunciati in pazienti diabetici”. Academic year 2022/2023.
- Advisor of Giada Cecere, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Test in silico di un modello lineare tempo-variante glucosio-insulina per il controllo della glicemia”. Academic year 2022/2023.
- Advisor of Angelica Calia, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Studio della variabilità della sensibilità insulinica in pazienti affetti da diabete di tipo 1”. Academic year 2022/2023.
- Advisor of Denis Byku, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Pancreas artificiale: la rivoluzione nel trattamento del diabete di tipo 1”. Academic year 2022/2023.
- Advisor of Sofia Del Vento, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Sistema di rilevamento dei pasti non annunciati per pazienti affetti da diabete di tipo 1”. Academic year 2021/2022.

- Advisor of Antonio Sabatini, Bachelor Thesis in Industrial Engineering, University of Pavia. “Sistema di rilevamento dei pasti non annunciati per pazienti affetti da diabete di tipo 1”. Academic year 2021/2022.
- Advisor of Luca Maurice Lombardi, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Modelli glucosio-insulina: gestione della variabilità intra-individuale”. Academic year 2021/2022.
- Advisor of Matteo Ragni, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Progettazione di un sistema di controllo per la manovra di un’imbarcazione tramite regolatori PI con schemi di disaccoppiamento”. Academic year 2020/2021.
- Advisor of Denaldo Gjerka, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Identificazione di un modello a scatola nera per il controllo dell’ossigeno in un impianto di depurazione”. Academic year 2020/2021.
- Advisor of Emanuele Cardinale, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Rete LSTM per la predizione della glicemia: addestramento su paziente in silico per il Pancreas Artificiale”. Academic year 2021/2022
- Advisor of Pietro Leoncini, Bachelor Thesis in Biomedical Engineering, University of Pavia. “OhioT1DM dataset: analisi ed elaborazione dati per l’addestramento di reti neurali LSTM”. Academic year 2021/2022
- Co-Advisor of Giacomo Licchetta, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Uno sguardo al mondo delle reti neurali: confronto fra Long Short-Term Memory e Temporal Convolutional Networks”. Academic year 2021/2022
- Advisor of Greycia D’Angiò, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Addestramento di una rete neurale LSTM per la simulazione di un processo di acque reflue”. Academic year 2020/2021.
- Advisor of Emanuela Morello, Bachelor Thesis in Biomedical Engineering, University of Pavia. “OhioT1DM dataset: studio di una base dati consistente per future applicazioni biomediche”. Academic year 2021/2022
- Advisor of Valeria Rita Orlando, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Sviluppo e analisi di reti neurali LSTM per la predizione di picchi ipoglicemici in pazienti diabetici di tipo 1”. Academic year 2019/2020.
- Advisor of Mattia Scivola, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Studio e sviluppo di reti neurali per sistemi dinamici tramite Python”. Academic year 2019/2020.
- Advisor of Sara Lanzarone, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Reti LSTM personalizzate per il pancreas artificiale: valutazione delle performance in un caso studio in silico”. Academic year 2019/2020.
- Advisor of Davide Malerba, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Reti neurali ricorrenti: studio di reti LSTM e possibili applicazioni”. Academic year 2019/2020.
- Advisor of Chiara Maria Buffoni, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Modelli per il pancreas artificiale: studio di reti LSTM”. Academic year 2019/2020.

- Advisor of Alessandro Scarpelli, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Modello intraperitoneale per la cinetica dell’insulina nel diabete di tipo 1”. Academic year 2019/2020.
- Advisor of Eleonora Trapani, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Identificazione in silico di modelli glucosio - insulina intraperitoneale: analisi della tempo-varianza e delle non linearità”. Academic year 2019/2020.
- Advisor of Alessandro Alini, Bachelor Thesis in Electronic Engineering, University of Pavia. “Modellizzazione e controllo tramite un regolatore PID di un piano basculante”. Academic year 2019/2020.
- Advisor of Serena Marino, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Identificazione in silico di modelli glucosio-insulina per pazienti diabetici di tipo 1 trattati con terapia intraperitoneale”. Academic year 2019/2020.
- Advisor of Lara Ronga, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Terapie insuliniche per il diabete mellito di tipo I: differenze tra somministrazione sottocutanea e intraperitoneale”. Academic year 2019/2020.
- Advisor of Simone Rancati, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Pancreas artificiale personalizzato: predizioni della glicemia di un paziente diabetico di tipo 1 tramite un multi-modello”. Academic year 2019/2020.
- Advisor of Eleonora Luppi, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Pancreas artificiale adattativo: analisi in-silico dei dati clinici e proposta di miglioramento della velocità di convergenza della terapia diurna”. Academic year 2019/2020.
- Advisor of Irene Schimperna, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Studio di reti neurali LSTM per l'identificazione di modelli di sistemi dinamici”. Academic year 2019/2020.
- Advisor of Virginia Sampognaro, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Pancreas artificiale adattativo: analisi in-silico di dati clinici e proposta di miglioramento della velocità di convergenza della terapia notturna”. Academic year 2019/2020.
- Advisor of Martina Suppa, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Pancreas artificiale adattativo: analisi in-silico di dati clinici e proposta di miglioramento dell' algoritmo di controllo”. Academic year 2019/2020.
- Advisor of Alessandro Ferrari, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Identificazione del multi-modello di un paziente diabetico di tipo 1 per lo sviluppo di un pancreas artificiale”. Academic year 2019/2020.
- Advisor of Lucia Mantova, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Miglioramento e personalizzazione dell’algoritmo adattativo utilizzato per la taratura della terapia insulinica intraperitoneale di una popolazione di 100 pazienti virtuali”. Academic year 2018/2019.
- Advisor of Sara Macri, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Modellizzazione e controllo di un piano basculante affetto da non linearità”. Academic year 2018/2019.
- Advisor of Davide Vairetti, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Sviluppo e validazione di un’interfaccia utente per la sperimentazione animale di un pancreas artificiale con infusione intraperitoneale”. Academic year 2018/2019.

- Advisor of Andrea Pigozzi, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Ottimizzazione della terapia insulinica basale in pazienti affetti da diabete di tipo 1 caratterizzati da variabilità di tipo intra- e inter-day”. Academic year 2018/2019.
- Advisor of Daniele Viola, Bachelor Thesis in Electronic and Telecommunication Engineering, University of Pavia. “Modellizzazione e controllo di un piano basculante”. Academic year 2018/2019.
- Advisor of Elisa Setti, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Definizione della terapia insulinica ottimale somministrata per via intraperitoneale in maialini diabetici alimentati per via intravenosa”. Academic year 2018/2019.
- Co-Advisor of Roberto Gallotta, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Uso di reti neurali per la previsione della glicemia per pazienti diabetici”. Academic year 2017/2018.
- Advisor of Alessia Gerbasi, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Identificazione di multi-modelli metabolici individualizzati per pazienti diabetici di tipo 1”. Academic year 2017/2018.
- Advisor of Roberto Di Matteo, Bachelor Thesis in Biomedical Engineering, University of Pavia. “Identificazione di multi-modelli metabolici individualizzati per pazienti diabetici di tipo 1”. Academic year 2017/2018.
- Advisor of Riccardo Merlano, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Studio dei fattori che influenzano la risposta al pasto durante la sperimentazione di un pancreas artificiale nel centro clinico Amsterdam”. Academic year 2016/2017.
- Advisor of Claudio Vitelli, Bachelor Thesis in Electronic Engineering, University of Pavia. “Studio dei fattori che influenzano la risposta al pasto durante la sperimentazione di un pancreas artificiale nel centro clinico Montpellier”. Academic year 2016/2017.
- Advisor of Francesco Carella, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Studio di tecniche per la taratura automatica di un PID per il controllo del vapore in un autoclave”. Academic year 2016/2017.
- Co-Advisor of Federica Chiesa, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Identificazione di Modelli Lineari per il Pancreas Artificiale”, Advisor Prof. Lalo Magni. Academic year 2013/2014.
- Co-Advisor of Simone Mancini, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Sviluppo e validazione di un’interfaccia per la sperimentazione clinica di un Pancreas Artificiale”, Advisor Prof. Lalo Magni. Academic year 2010/2011.
- Co-Advisor of Marco Acquistapace, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Modelli del sistema glucosio-insulina per pazienti diabetici di tipo 1 basati sulla risposta impulsiva”, Advisor Prof. Lalo Magni. Academic year 2009/2010.
- Co-Advisor of Gabriele Tiberti, Bachelor Thesis in Computer Science Engineering, University of Pavia. “Sistema di telemedicina per Pancreas Artificiale: predisposizione in tempo reale dei dati acquisiti da trasmettere”, Advisor Prof. Lalo Magni. Academic year 2009/2010.

Editor and Referee Activity

- Associate Editor of IEEE Transactions on Control Systems Technology.

- Associate Editor of Clinical Diabetes, special section of Frontiers in Endocrinology, Frontiers in Public Health, Frontiers in Neuroscience and Frontiers in Nutrition.
- Reviewer Editor of Control and Automation Systems within the journal Frontiers in Control Engineering.
- Guest editor of the special issue entitled “Recent Advances in Computer Simulation for Diabetes Treatment and Care” in the Frontiers in Endocrinology.
- Referee in the Bioengineering field (Science, Nature, Nature Communications, IEEE Transactions on Biomedical Engineering, IEEE Journal of Biomedical and Health Informatics, Journal of Diabetes Science and Technology, Diabetes Technology and Therapeutics, Computers in Biology and Medicine, Computer Methods and Programs in Biomedicine, Journal of Diabetes Research, Journal of Medical Research and Innovation Diabetes, Engineering Science and Technology an International Journal, Biocybernetics and Biomedical Engineering, Sensors, Biomedical Signal Processing and Control, Journal of Healthcare Engineering, JMIR Diabetes, IEEE Open Journal of Engineering in Medicine and Biology).
- Referee in the Automatic Control field (IEEE Transactions on Automatic Control, IEEE Transactions on Systems, Man and Cybernetics Systems, Engineering Applications of Artificial Intelligence, Journal of Process Control, Optimal Control Applications and Methods, Complexity Journal, Mathematical Problems in Engineering, Transactions on Control Systems Technology, Transactions on Computational Social Systems, IEEE Access, Nonlinear Analysis Hybrid Systems, Robust and Nonlinear Control, Expert Systems With Applications).
- Conferences Referee in the Automatic Control field (IEEE Conference on Decision and Control – CDC, International Federation of Automatic Control World Conference – IFAC, American Control Conference – ACC, IFAC Conference on Nonlinear Model Predictive Control, International Symposium on Mathematical Theory of Networks and Systems, IEEE International Conference on Systems, Man, and Cybernetics, International Symposium on Mathematical Theory of Networks and Systems, IFAC Symposium on Dynamics and Control of Process Systems, including Biosystems, IFAC Workshop on Control Applications of Optimization).
- Conferences Referee in the Bioengineering field (IFAC Symposium on Biological and Medical Systems).

Skills

Software/programming skills	Excellent: Matlab, GUI development (Matlab) Medium: R, Java, Python, Django, SQL Sufficient: SPSS, C language, Xml, xls, css, hibernate, javascript, jsp, Liferay technology
Organizational skills	Good organizational skills
Social skills	Good skills to work in team
Languages	Italian (native language), English (medium level)
Driving license	Driving License B (car)

Extra-curriculum activities

2007 – 2009	Technical assistance and software developer for a financial web portal Noema STI srl – Viale Brambilla, n. 58 27100 Pavia (Italy)
-------------	---

<http://www.noema.it>

Jun 2007 - Oct 2007

Internship: training and development of web portal using
Liferay technology

Noema STI srl – Viale Brambilla, n. 58
27100 Pavia (Italy)

<http://www.noema.it>

Personal interests

Dancing, traveling, skating, biking, watching movies, reading

Date

14 / 05 / 2024

Signature

Chiara Toffanin
